Sign-In using the credentials in setup

For bulk upload of potential customers at initial usage, use Import feature to download the template and upload with minimum mandatory fields. You will see all those potential customers added to the product.

For incremental adds of potential customers, use Add Lead form and fill with basic details

In Add Lead Form, only three fields are mandatory to user. (Full Name, Phone Number, Lead Source)

If no phone number, still we can Add Lead by entering any 10 digit number like 9999999999

And lastly, use Settings to update your preference including Notifications.

The screenshot shows the 'Settings' page in the LeadsFlow application. The header includes the LeadsFlow logo, a welcome message for 'Goodwill Consulting Services', and navigation links for Leads, Analytics, and Settings. The user is identified as 'Test User' with email 'forefoldai@gmail.com'. The 'Settings' section is titled 'Manage your account settings and preferences' and has five tabs: Profile, Notif, Security, Prefs (selected), and Data. The 'Prefs' tab is titled 'Application Preferences' with the subtitle 'Customize your LeadsFlow experience'. It contains four settings: 'Default Lead View' set to 'Table View', 'Items Per Page' set to '20 items', 'Auto-save Changes' (checked), and 'Compact Mode' (unchecked). A 'Save Preferences' button is at the bottom right.
